ARTISTRY IN IRON

Capital F

Fine design is not just a flight of fancy, it should reflect the reality of the age it represents and give aesthetic and practical solutions to the way we live our lives. Thus in entering the twenty first century this all new CAPITAL range of metal furniture from Artistry In Iron combines fine contemporary design with striking combinations of different raw materials,

fashioned and formed using state of the art technology.

Utilising modern production computer controlled manufacturing such as laser profile cutting, precision component machining and fine grinding and polishing methods, combined with durable clear powder coating gives a range truly appropriate to this new millennium.

Naturally this range is available with the wide choice of fabrics, glass or timber tops and the full range of metal finishes offered on all the other Artistry In Iron ranges. For the CAPITAL range two additional finishes of Silver and polished natural steel with clear powder coat are also available as these finishes truly reflect the virtues of this stunning range.
